In shopping centres across Ontario, including the Carlingwood Shopping Centre, there is a Fast Time Watch and Jewellery Repair store offering you high-quality and attentive service, amazing value, and the wisdom of 40 years in the business behind them.

You're probably thinking to yourself — 40 years in business? But I've never heard of them before. Of course you have! When you hear their previous name — Sears Watch and Jewellery Repair (hence the name change).

There used to be 62 locations in five provinces, with a reputation for not just offering excellent work, but for caring for your jewellery and watches as much as you do. Then, one day, big changes — no more Sears.

"The house we were in, the roof crashed in," says Milon Talsania, vice-president of operations. But, thankfully, he knew that this couldn't be the end of the business. "Our business model was strong," he says. "We just had to find a new home."

And so they did. Within a year of the Sears nationwide shutdown, Fast Time Watch and Jewellery Repair opened 12

The Carlingwood location has stepped out of the kiosk and is now a state-of-the-art watch and jewellery repair store.

locations. In fact, the Carlingwood location was opened within a week, and was able to protect the jobs of all those who worked at the previous location.

Now, the Carlingwood location has stepped out of the kiosk and is now a state-of-the-art watch and jewellery repair store, which will provide everything its customers could ask for at the same great value.

For those who previously enjoyed Fast Time's high-quality service and stellar reputation at the CF Rideau Centre or at the St. Laurent Shopping Centre, you will find that

same commitment to excellence at the Carlingwood Shopping Centre.

With 40 years behind them, Fast Time Watch and Jewellery Repair knows what their customers want. So, it only stands to reason they would know what their customers want to buy. Fast Time now sells a range of products, such as Fossil and Timex, as well as their exclusive line of Milon and Tanvi watch bands. These were created for a quality alternative to high-end watch bands, including the ability to keep existing buckle with the designer label on it — for a fraction of the price.

Fast Time can fix any brand, at any level or price point. "Many jewellery stores only help customers with items they

have purchased there," says Talsania. "Well, we do it all! We fix anything from a Timex to a Rolex, and everything in

between. Buy it anywhere ... fix it here."

The staff is very attentive to every part of the process, as well. Whether you are looking to simply replace a watch battery, you won't find a better value anywhere else. This includes their one-year warranty. If you are looking for water-resistant testing, to ensure your watch is protected, they offer this service, as well. And, a free estimate is available for all repairs so you can make an informed choice.

From the most technical of watches to the most sentimental jewellery, those who represent the Fast Time name are knowledgeable, precise and guided by the same sense of caring and responsibility that has given Fast Time its successful 40-year history.

Visit the new location of Fast Time Watch and Jewellery Repair in the Carlingwood Shopping Centre, or at any of their continually growing locations throughout Ontario. You will find a company's commitment to quality and service, which has only catapulted from what could have been a disaster for some businesses and took the opportunity to truly reach its full potential.
